With its versatile formulation, Peak Universal Bond is the only adhesive you need.

Contains chlorhexidine (0.2%), which may ensure long-term bond strength.*

PEAK UNIVERSAL BOND TECHNIQUE GUIDE

* Studies show that an optimum concentration of CHx can potentially improve long-term integrity of hybrid collagen.
PEAK® UNIVERSAL BOND features a versatile formulation that bonds to dentin, enamel, porcelain, metal, composite, and zirconia. It is ideal for indirect and direct bonding, including post and core procedures, and works with Self-Etch and Total-Etch techniques. It offers convenient syringe delivery and optimal viscosity to ease application and minimize waste.
Associated Product List:

Peak® SE
- Self-etching primer
- Stable, fresh chemistry delivered via unique JetMix syringe
- Easy, one-coat technique with convenient, precise placement

Black Mini® Brush Tip
- Precise, controlled delivery of aqueous materials
- Tight, adjustable brush fibers minimize bubbles

VALO®
- Three curing modes—Standard, High Power, and Xtra Power
- Optimally collimated beam delivers a complete, uniform cure
- Broadband LEDs cure all dental materials
- Lightweight, durable wand accesses hard-to-reach areas

Inspiral® Brush Tip
- Smooth delivery of viscous or filled materials via an internal helical channel and ridge
- Tight, adjustable brush fibers minimize bubbles

Consepsis®
- Longest and most effective antimicrobial activity
- Reduces risk of recurrent caries
- Reduces potential for post-operative sensitivity
- Increases bond strengths with many dentin bonding agents

1 M. R. Leonardo, DDS, PhD, M. Tanomaru Filho, DDS, P. Nelson Filho, MS, K/C. Bonifacio, MS, and I.Y. Oto, DDS, PhD In Vivo Antimicrobial Activity of 2% Chlorhexidine Used as a Root Canal Irrigating Solution J Endod; 1999, 25(3): 167 - 171
1. Apply Ultra-Etch®

2. Apply Ultra-Etch®

3. Apply Ultra-Etch®

4. Optional Consepsis® (where available)

5. Apply Consepsis® (where available)

6. Apply Peak® Universal Bond

7. Apply Peak® Universal Bond

8. Apply Peak® Universal Bond

9. Apply Peak® Universal Bond
Associated Product List:

Ultra-Etch®
• Distinctive blue color enhances proper placement and ensures complete removal
• Ideal viscosity prevents premature drying, inadequate etching, and vertical migration
• Unique self-limiting chemistry prevents over etching

Blue Micro® Tip
• Narrow cannula precisely delivers materials
• Optimal with Ultra-Etch

VALO® (See pg. 4)
Inspiral® Brush Tip (See pg. 4)
Consepsis® (See pg. 4)
1. Peak Universal Bond Total-Etch for Post Placement

2. TriAway and Endo-Eze®

3. 22ga

4. 22ga

5. 10sec.

6. 20sec.

7. 20sec.

8. UltraEtch®

9. TriAway and Endo-Eze®

10. TriAway and Endo-Eze®

11. TriAway and Endo-Eze®

12. TriAway and Endo-Eze®

13. Intraoral Tip

14. PermaFlo® DC

15. PermaFlo® DC

16. PermaFlo® DC
Associated Product List:

Black Mini® Brush Tip (See pg. 4)
Ultra-Etch® (See pg. 6)
Blue Micro Tip® (See pg. 6)
VALO® (See pg. 4)

PermaFlo DC
• Highly filled, dual cure luting resin with the lowest film thickness available
• Versatile formulation with maximum strength and wear-resistance
• Radiopaque with low polymerization shrinkage

Mixing Tip
• Mixes and delivers in one action
• Optimal with Ultradent’s Dual-Barrel Syringes

22ga Endo-Eze® Tips
• Ideal for a variety of Endodontic procedures
• Flexible, strong cannulae in a variety of gauges (only 22g shown)
• Easily bendable

UniCore®
• Superior strength
• Esthetic and radiopaque
• The only 3-in-1 drill
• Color-coded drills and posts
• Autoclavable as packaged
• Ultradent’s UniCore “Kit of Kits” provides all items needed for post requirements

NaviTip® FX Tips
• One-of-a-kind brush cleans, scrubs, and irrigates simultaneously
• Available in 17 or 25mm lengths, with a rigid 30 gauge cannula

TriAway Adapter
Use for controlled administration of water and/or air to depths of cavity preparations, such as minimally invasive operative-type preparations or endodontic preparations. Do NOT use in open canals.

A. Metal based: 1) Microabrade or sandblast inside surface of prosthesis 2) Apply phosphoric acid to inside surface of prosthesis for 15 seconds to clean, rinse 5 seconds, dry.

B. Ceramic / porcelain: 1) Apply hydrofluoric acid to inside surface of prosthesis for 90 seconds, rinse and dry. 2) Apply Ultra-Etch for 5 seconds to remove salts. Rinse and dry. 3) Apply silane to inside surface of prosthesis for 1 minute, dry and set prosthesis aside. **Do not rinse.**

C. Zirconia: 1) Prepare as per manufacturer’s instructions.
Associated Product List:

UniCore® Posts and Drill
- Strong, esthetic, radiopaque posts match the characteristics of dentin, minimizing the chance of root fracture
- 3-in-1 drill removes rigid obturators, gutta percha, or composite
- Drill and posts are color-coded and autoclavable as package

Ultra-Etch® (See pg. 6)
Blue Micro Tip® (See pg. 6)
PermaFlo DC (See pg. 6)
VALO® (See pg. 4)
Mixing Tip (See pg. 8)

Consepsis® Scrub
- Reduces post-op sensitivity
- No bond strength compromise
- Non-splatter formula
- Scrub, clean, and disinfect in one operation

White Mac® Tip
- Dispense large volumes
- All-plastic delivery tips

STARBrush®
An intercoronal brush for cleaning hard-to-reach areas
- Effectively cleans where nothing else can
- Tight fibers help to prevent messes and apply appropriate pressure
- Ideal for use with Consepsis Scrub
**Peak Universal Bond Total-Etch Kit**

#4551 - Peak Universal Bond Total-Etch Intro Kit

1 - 1.2ml Peak Universal Bond syringe  
1 - 1.2ml Ultra-Etch syringe  
20 - Blue Micro tips  
20 - Inspiral Brush tips  

SHELF LIFE: 18 MONTHS. Refrigerated.

**Peak Universal Bond SE Self-Etch Kit**

#4554 - Peak Universal Bond Self-Etch Kit

1 - 1.2ml Peak Universal Bond syringe  
1 - 1.0ml Peak SE primer syringe  
20 - Black Mini Brush tips  
20 - Inspiral Brush tips  

SHELF LIFE: 18 MONTHS. Refrigerated.

**Refill**

#4553 - Peak Universal Bond Refill

4 - 1.2ml Peak Universal Bond syringe  

SHELF LIFE: 18 MONTHS. Refrigerated.

**Econo Refill**

#4552 - Peak Universal Bond Econo Refill

20 - 1.2ml Peak Universal Bond syringe  

SHELF LIFE: 18 MONTHS. Refrigerated.

**Associated Ultradent Tips**

Black Mini Brush Tips  
#1169 - 100pk  
#1432 - 500pk

Inspiral Brush Tips  
#123 - 100pk  
#1033-1 - 500pk

Blue Micro Tips  
#127 - 100pk  
#1436 - 500pk

30ga Navi Tip FX Tips  
#1452 - 20pk
